

# VBCUA USER MANUAL & SYSTEM OPERATOR GUIDE

Step-by-Step Guide to Executing, Configuring, and Operating VBCUA

## 1. Local Execution Guide

To launch the application locally:

1. Open a terminal in the project root directory.
2. Activate your Python virtual environment.
3. Execute the Streamlit command: ``streamlit run app.py``.
4. Access the local port in your browser: ``http://localhost:8501``.

## 2. Functional Interface Walkthrough

- **Evaluation Tab**: Select your target concept from the pre-populated dropdown, upload a WAV/MP3 audio recording, review the analysis dashboard, and download the PDF report.
- **Concepts Tab**: Manage the SQLite reference database. Add a new concept by typing its title and reference explanation text.
- **History Tab**: Access previous evaluations, view detailed metrics and side-by-side text comparisons, download past PDF reports, or delete past runs (CRUD).

## 3. Administrator Configurations

In the sidebar, administrators can adjust the Whisper model size (tiny, base, small) and set the Librosa silence threshold (dB) depending on background noise levels.
