

PRESENTATION & COMMUNICATION GUIDE

Demo Delivery Strategy & Structure for Project Showcase

1. Key Communication Strategy

The presentation must explain the educational value of evaluating spoken responses. By assessing how students explain concepts in their own words, we measure deep understanding. The demonstration should highlight the transition from raw audio data to structured semantic scoring, speech pacing, and volume analysis, concluding with a downloadable PDF report.

2. Presentation Agenda

1. **The Problem**: Manual grading of audio explanations is time-consuming and subjective.
2. **The Architecture**: Local speech transcribing, Sentence-BERT semantic similarity, acoustic feature extraction, and SQLite database storage.
3. **Live Demonstration**: Upload an audio explanation and review overall scores, pacing analysis, and side-by-side content comparisons.
4. **PDF Output**: Open the compiled PDF report, showcasing the professional print layout.
